PANDAVIEW LAWN&GARDEN(QD)LIMITED

Welcome

We are proud to present our 2014–2015 Brochure that includes many beautiful sets of garden furniture to inspire and excite you. The brochure has an excellent selection for you to choose from: polyethylene weave, textile, stainless steel, aluminum and Steel style.

We were formed in 2005, with the ambition to create excellent garden furniture, giving the public the opportunity to own high quality pieces built to last. Over the years we have achieved this goal and earned good reputation, with PandaView brand being synonymous with innovation, high quality, durability and reasonable prices.

Our experienced Sales and Customer services team is always on hand to assist you before and after your purchase. So rest assured PandaView is dedicated to both furniture making and taking care of our customers.

The Environment protection

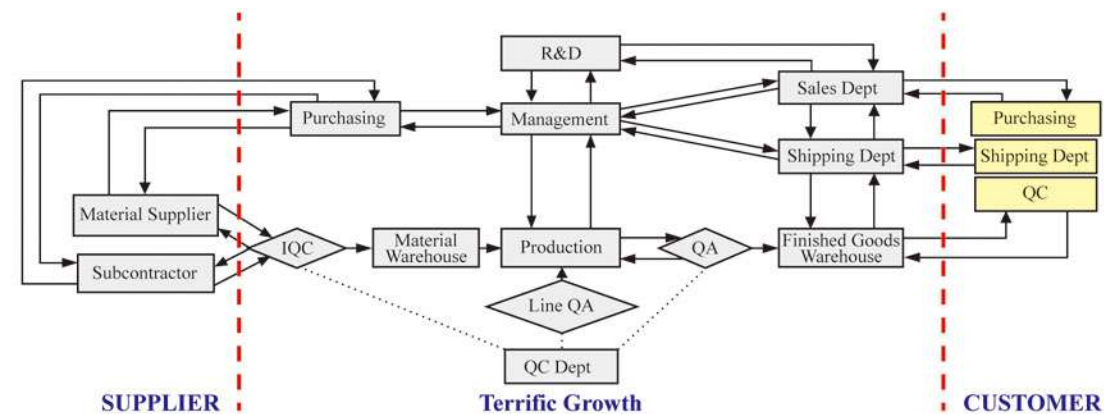

We understand the importance of its environmental responsibilities and the safety of materials combined with responsible workers conditions. This has always been our way of business and fundamental to our core beliefs and values. We will therefore:

- Actively seek out and evaluate opportunities to manufacture and sell products that are from responsibly managed material sources.
- Seek to minimise the environmental impact of other associated raw materials that we use.
- Dedicate resources to the development of carbon footprint reduction across our diverse range of products and product materials.
- Minimise the waste generated from our production process and recycle or reuse unavoidable waste wherever possible.
- Not over package our products, and we will maximise our use of recycled materials for our packaging.

Quality Control

We strictly follow the principles of the ISO9001:2008 quality control and management system, she has also set up testing center to control and assure optimum quality for all products we sale. In order to customer know our quality control system, please read below general QC steps:

Material information

Weave is a synthetic, highly flexible, tensile-strength polyethylene fibre used on our Woven Collections of furniture. The fibres are made of high density polyethylene (HDPE), a 100% nonrecycle, nontoxic material. It is perfect for outdoor use and has unique properties that render it insensitive to UV rays and extreme weather conditions.

Aluminum is used for the frames in the sofa, dining sets, lounge and chairs. Using aluminium extruded tubes achieves a high strength-to-weight ratio, with the result being a very strong and light weight frame. Aluminum has corrosion-resistant properties which makes it ideal for outdoor use, it has a thin transparent oxide film giving it self-protection. The frames are also powder coated which provides an attractive finish.

Steel is used for the frames in the sofa, dining sets, lounge and chairs. All steel frame have dealt with anti-rast technology to keep furniture will not rast within two years at least. The frames are also powder coated which provides an attractive finish.

Glass is a material produced from a combination of quartz sand – silica, soda and lime. As well as being 100% recyclable, it will not deteriorate, corrode or stain. The Glass we use is tempered safety glass complying to GB/T 26695-2011.

Stainless Steel contains chromium to form a passive film of chromium oxide which prevents surface corrosion and overts it spreading into the metal's internal structure. We use grade 304 tubular sections which are chemically pickled and naturally passivated after fabrication to improve it's resistance to tarnishing.

Textilene is a tough synthetic fabric made of PVC coated polyester. It has specially formulated yarns developed to withstand UV fading, mildew and the most severe weather conditions. We offer an excellent choice of five colours to choose from black; white; taupe; metallic silver, grey and copper.

Plastic wood are produced by combining thermosetting resins reinforced under high pressures and temperatures. The result is an extremely tough and weather resistant material comparable to hardwood but not susceptible to weathering, mould or rot. Smooth to touch compact laminates have a pore free surface structure, ensuring that practically no dirt can accumulate and is completely unaffected by household cleaning agents or strong organic solvents. HPL is available in Grey, Taupe, and White.

Fabric comfortable, beautiful, and oh so livable. It's amazingly easy to maintain, and most spills can be cleaned with mild soap and water. For tough stain, bleach can be used without fear of damaging or removing the color. And some fabric can be anti-fire and waterproof.

Sponge is used for comfortable cushion, different density sponge used for furniture back, seat, pillow or side arms to keep your most comfortable.

- ▲ 4 pcs aluminum sofa set with polyethylene fiber include 3 seats, 2 seats, single seat and tables. 8 CM thickness cushion 100% polyester, 5 MM tempering glass.
- 4件套铝制沙发组合, 环保塑料藤编制, 包含三人沙发, 双人沙发, 单人沙发和咖啡桌, 100%涤纶布料8厘米海绵垫子, 5毫米钢化玻璃。
